AUDITORS FOR BODIES · INTERNAL AUDIT CONSULTANTS

AllMight Auditor

Software for auditors and ISO consultants

by computerization4u

Who it is for

Everything a body has, for one person: your engagements, audits on a tablet, the forms each ISO standard asks for and your charges, in one place.

Auditor for bodies

You take engagements from certification bodies: the body is the principal, it gets the report and the charge.

Internal audit consultant

You run your clients' yearly internal audits and hand them the standard's forms filled in.

Both

Only what you see in the menu changes, from Settings, whenever you like.

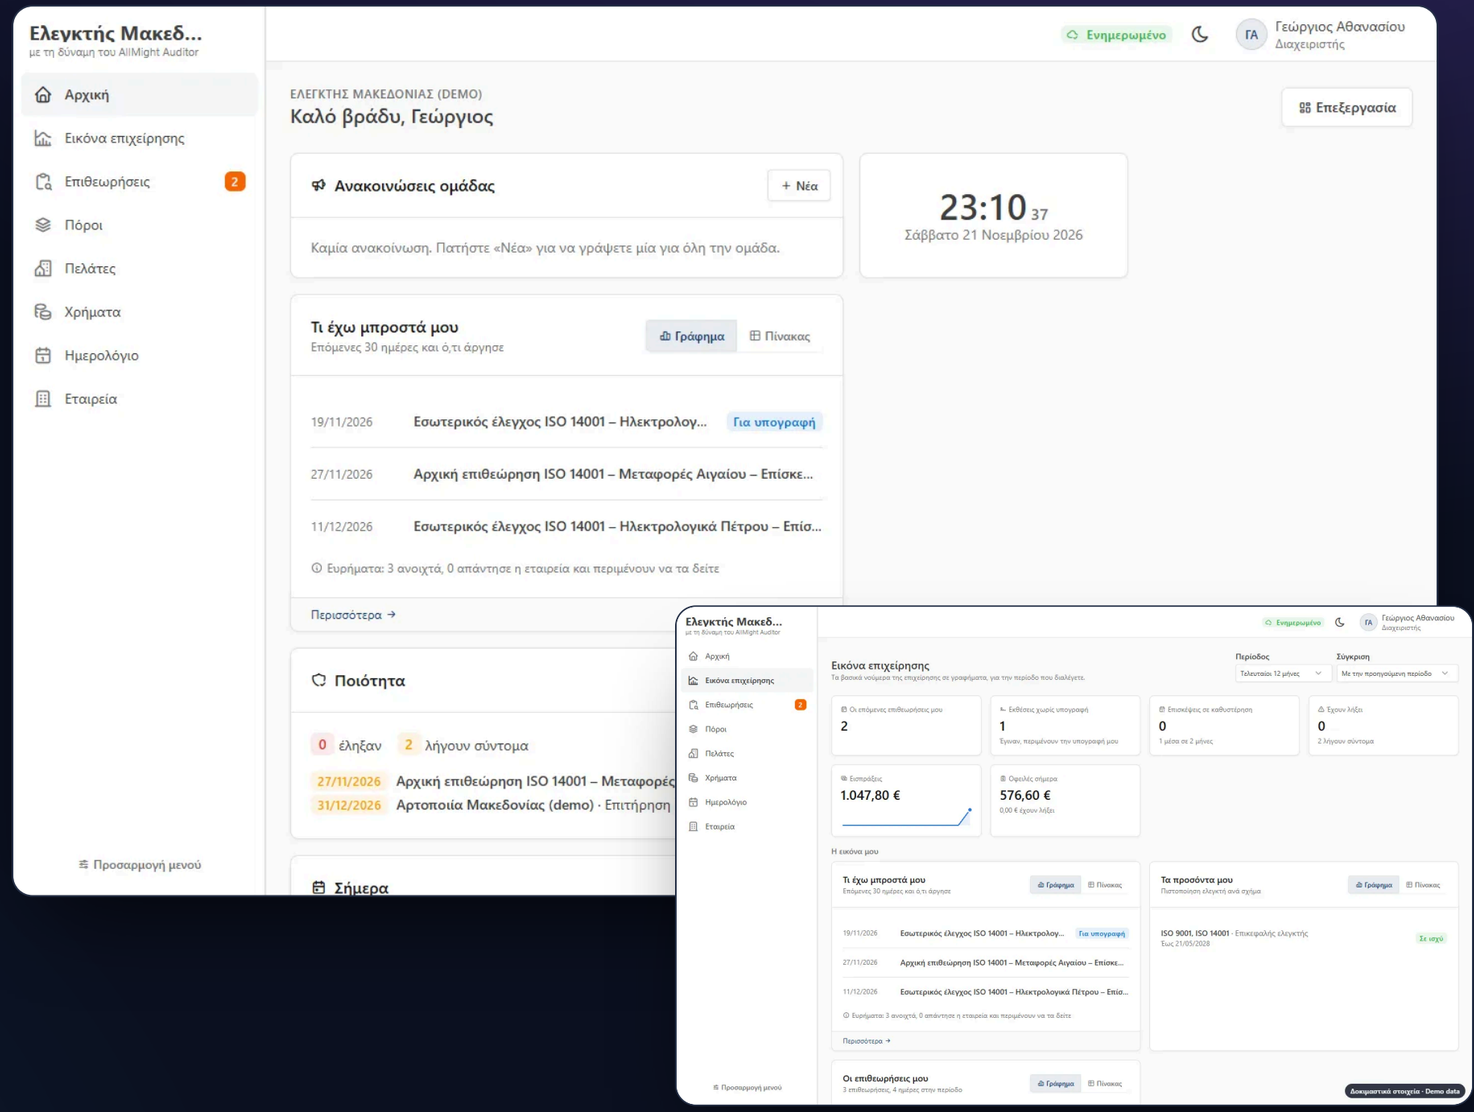

The audited company

Gets the report and, if you want, answers findings through a link, no account needed.

What is ahead of me

As soon as you open the app: your audits of the next 30 days, the ones that are late and the reports waiting for your signature.

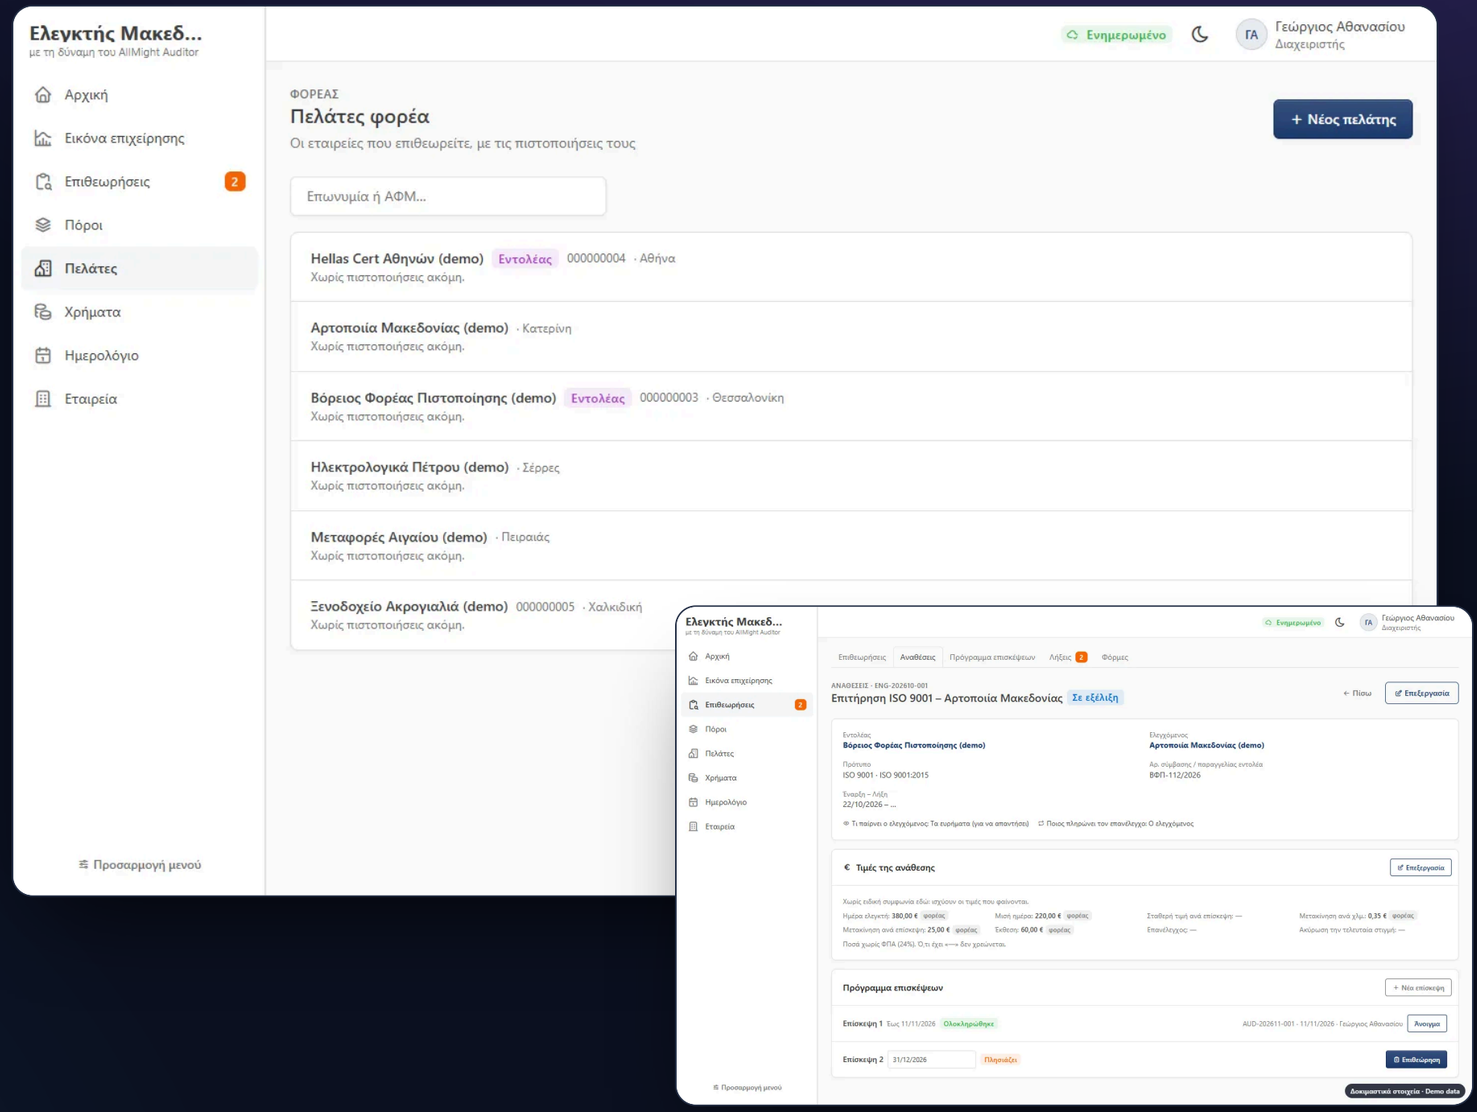

- ✓ Findings open or answered by the company
- ✓ Your auditor qualifications and when they end
- ✓ Audit days per standard
- ✓ Money in and money owed

Bodies, clients and engagements

The bodies that hire you, the companies you audit and your consulting clients. Every engagement with its principal, contract and visits.

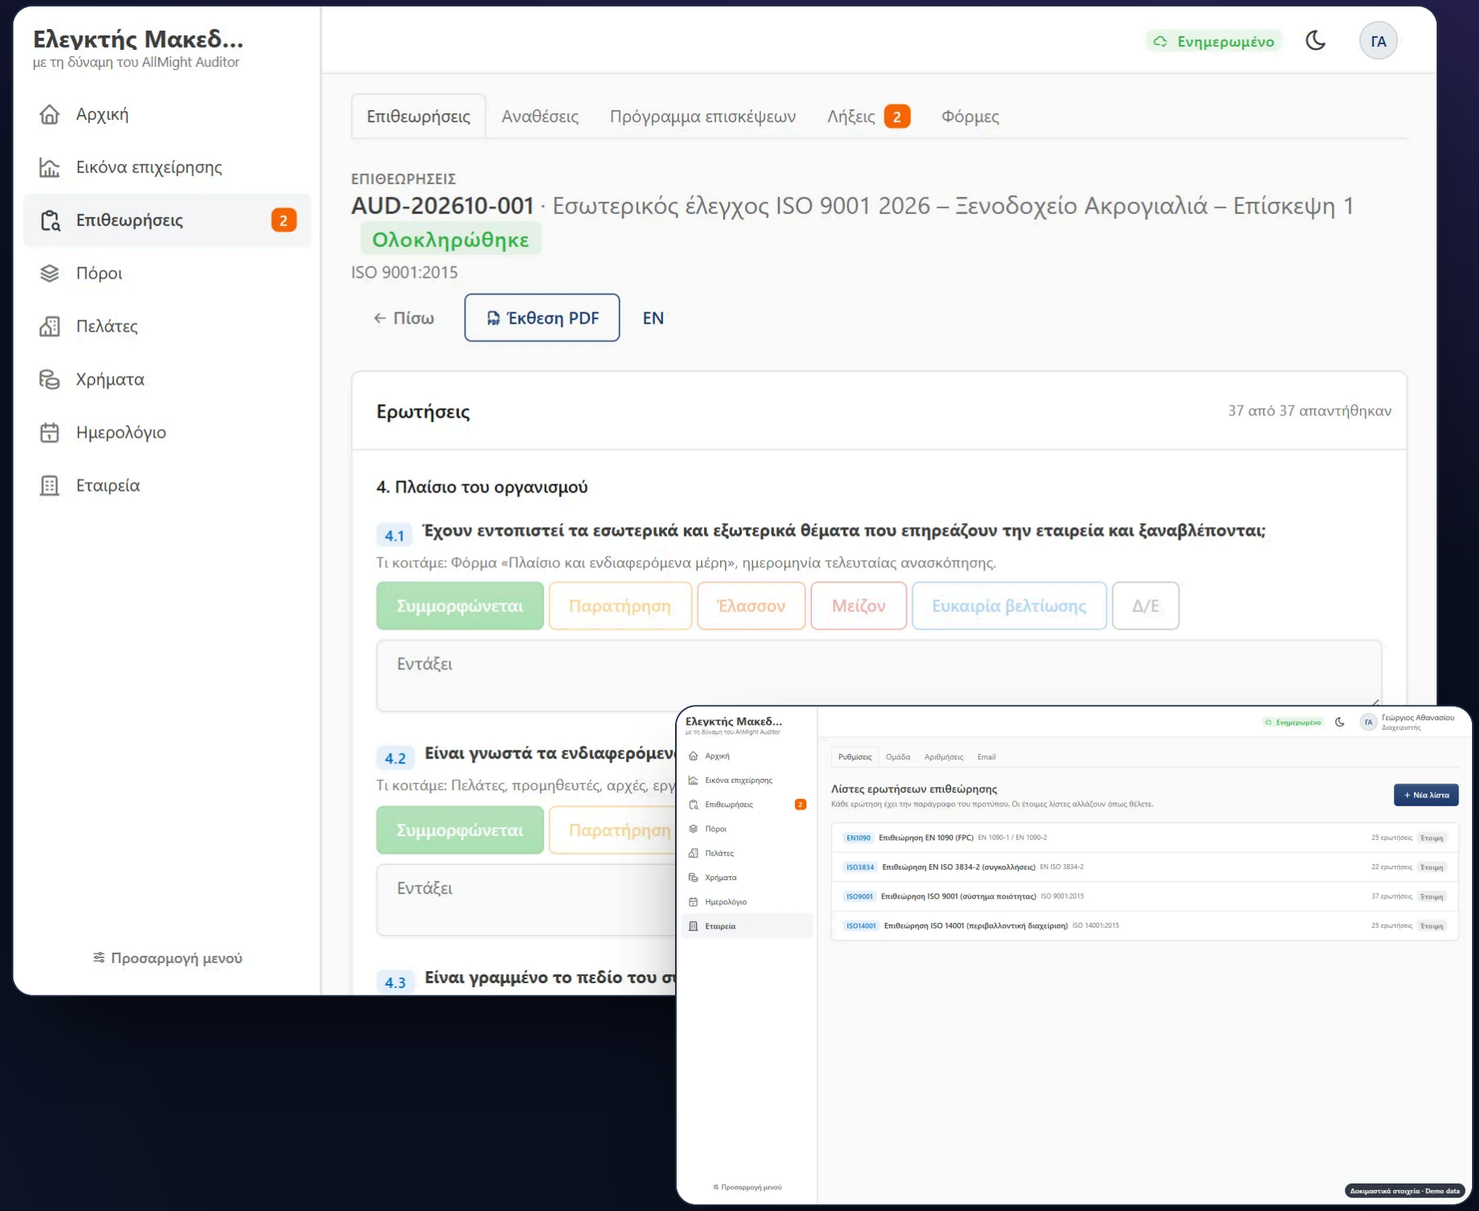

- ✓ The principal gets the report and the charge
- ✓ The auditee sees only what you allow
- ✓ A yearly internal audit programme per client
- ✓ Visits in the calendar and the morning email

The audit on a tablet

A ready checklist for each standard, with the clause and «what to look at». A «Minor» answer becomes a finding in one click.

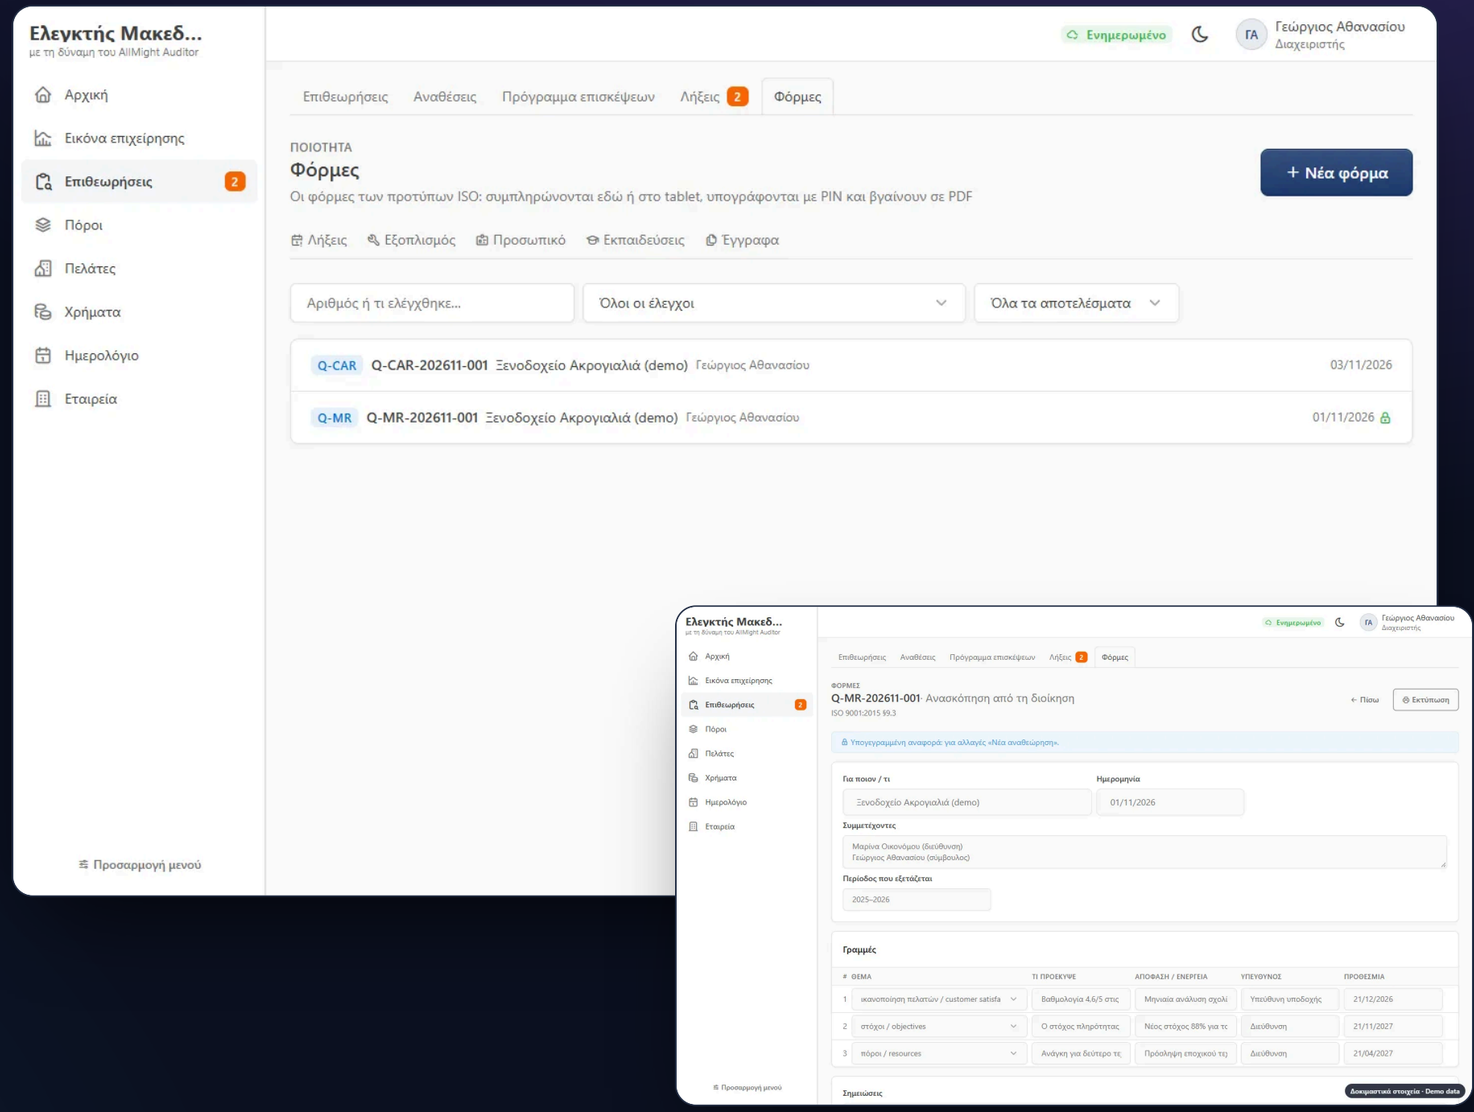

- ✓ ISO 9001, 14001, 45001, 22000 and 27001
- ✓ Greek and English, even offline
- ✓ PDF report signed with a PIN
- ✓ Change the checklists as you like

The forms of each standard

The records each standard asks for, ready: filled in here or on a tablet, signed with a PIN, printed as PDF.

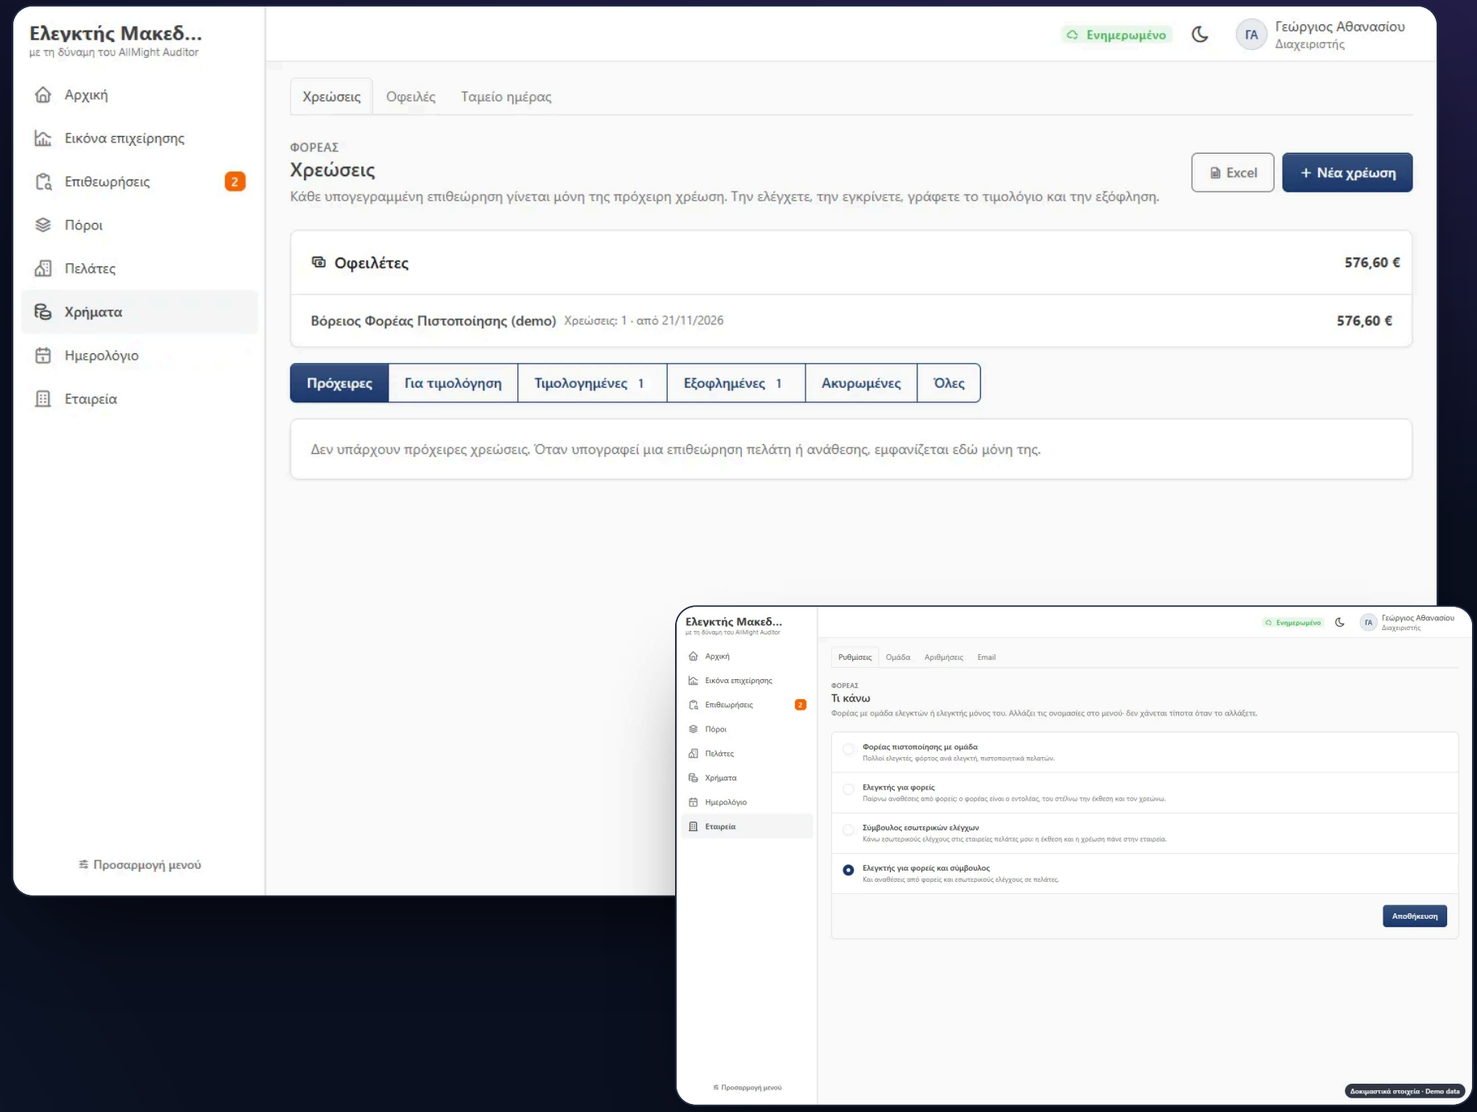

- ✓ ISO 9001: risks, objectives, suppliers, complaints, corrective actions, management review
- ✓ ISO 14001 / 45001: aspects, compliance obligations, risk assessment, incidents, evacuation
- ✓ ISO 22000: HACCP, critical control points, temperatures, recall
- ✓ ISO 27001: assets, risks, statement of applicability, incidents, access

Charges and what I do

Every signed audit becomes a charge by itself, to the body or the client, with your price list. In Settings you pick whether you work for bodies, as a consultant or both.

- ✓ Auditor day, travel, report
- ✓ Approval, invoice, payment, who owes
- ✓ Invoices from AllMight (myDATA) optional
- ✓ The menu follows what you do

And also

PIN signatures

A signed report or form is locked; changes need a new revision.

Greek and English

Reports and forms come out in both languages.

Even offline

The audit goes on at the client's site and is sent as soon as there is a connection.

Nothing to install

Opens in the browser on desktop, tablet and phone.

Let’s see it with your own clients

A demo with the standards you work with, your clients brought over and a trial period.

- ✓ 25 € a month with one standard
- ✓ Each further standard +5 €
- ✓ Trial period
- ✓ We bring over your clients
