AllMight Projects

Project management software

by computerization4u

For the manager, the team and the client

Every project in one place: who does what and when, how many hours went in, what was charged and what is left, and the client sees the progress without calls and emails.

Project manager

Phases, deadlines, who is behind, hours and cost against the budget.

The team

My tasks on the phone, comments with photos, a timer with one tap.

The client

Follows the progress, approves deliverables with a signature and sends files, no password.

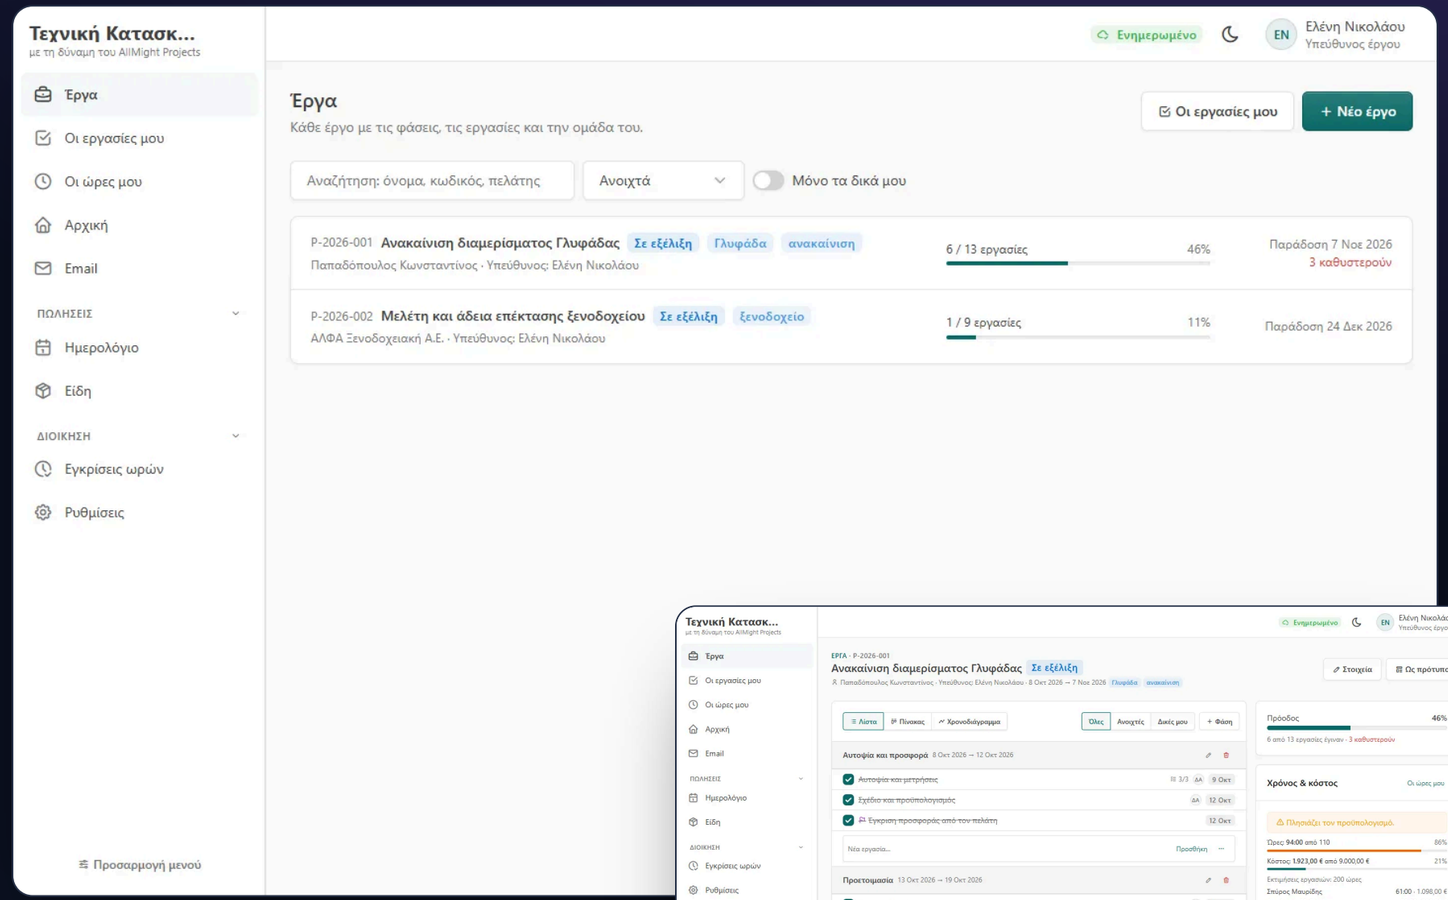

Accounts

Charges per milestone, by the hour or a fixed price, invoices and who owes.

Your projects at a glance

Every project with its client, manager, team, start and delivery. Progress and delays show at once.

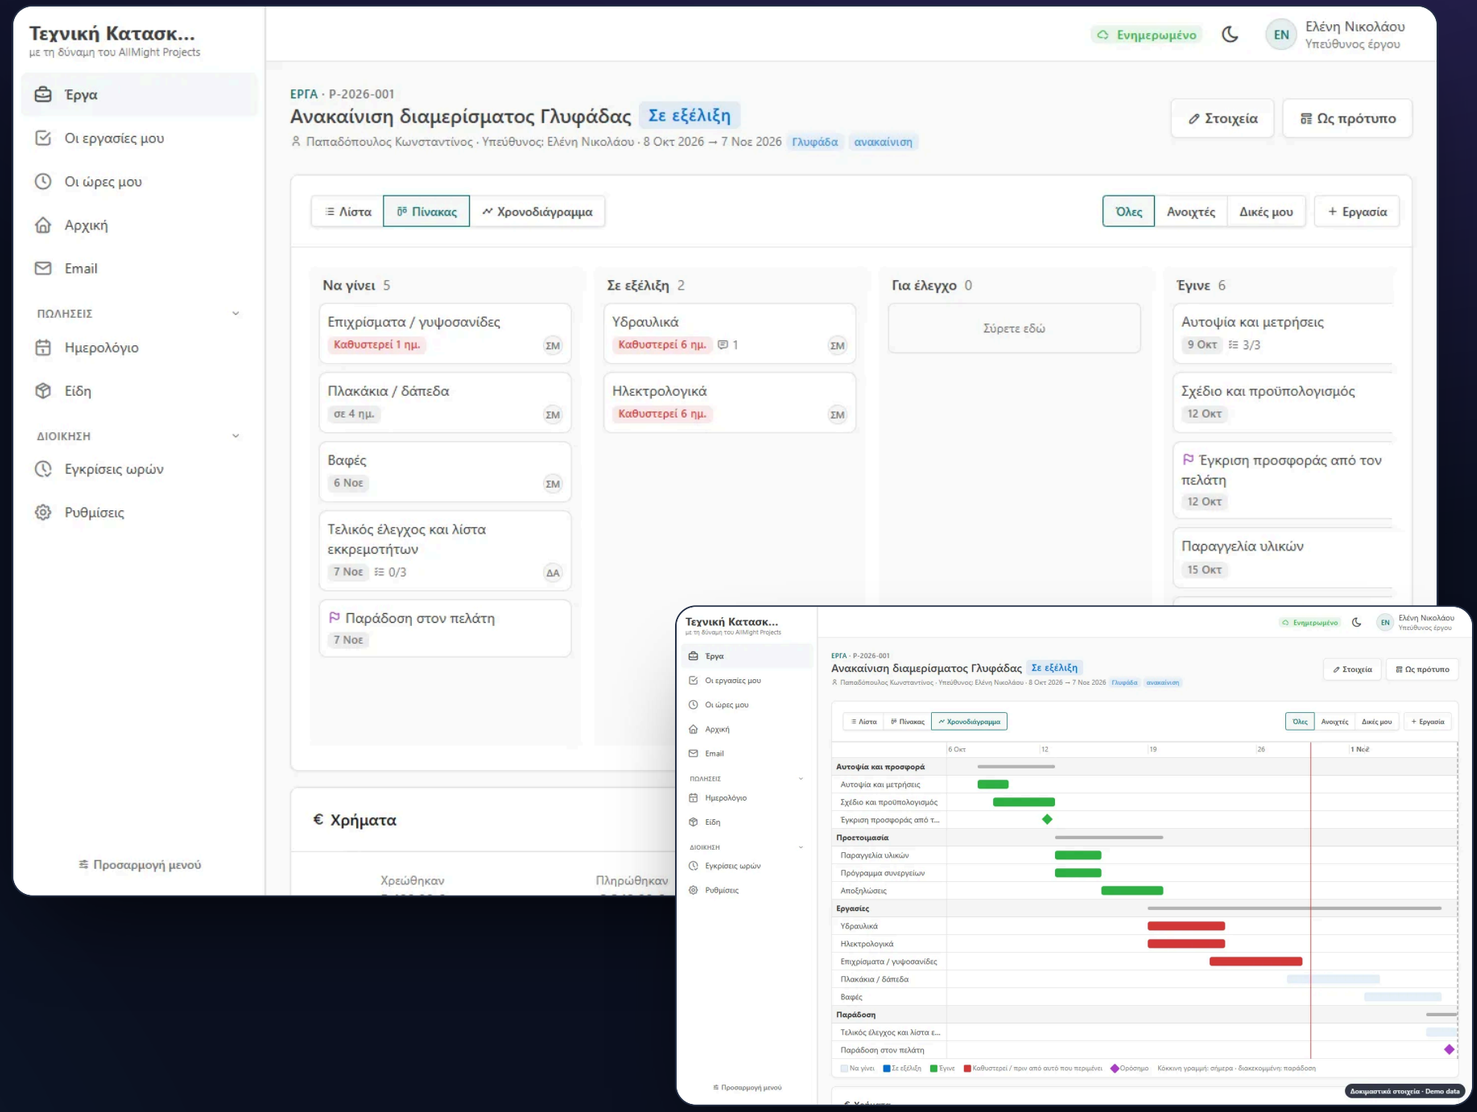

- ✓ Starts from a ready template with phases and dates
- ✓ Tags, search and «only mine»
- ✓ Team members see only their own projects
- ✓ Project files: drawings, contracts, photos

Board and timeline

The same work the way each person likes it: a list by phase, columns you drag cards across, or a timeline with today and the delivery date.

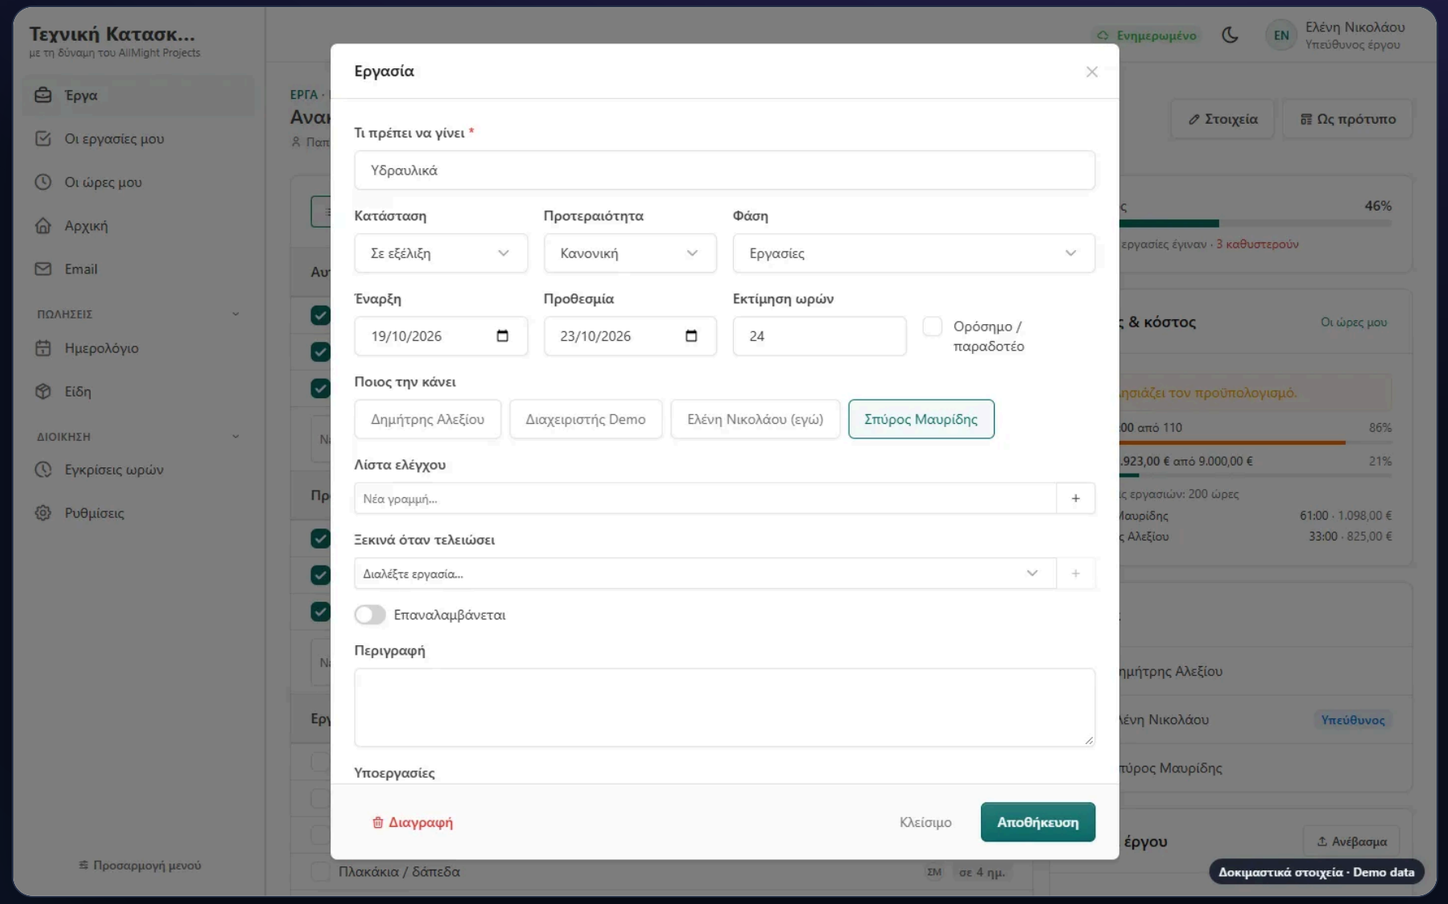

- ✓ Columns «To do», «Doing», «For review», «Done»
- ✓ «Starts when … is done»: the order of tasks
- ✓ Red for anything late
- ✓ Tasks and deliveries in the calendar

Tasks with everything

Who does it, deadline, priority, estimated hours, checklist, subtasks, files and comments.

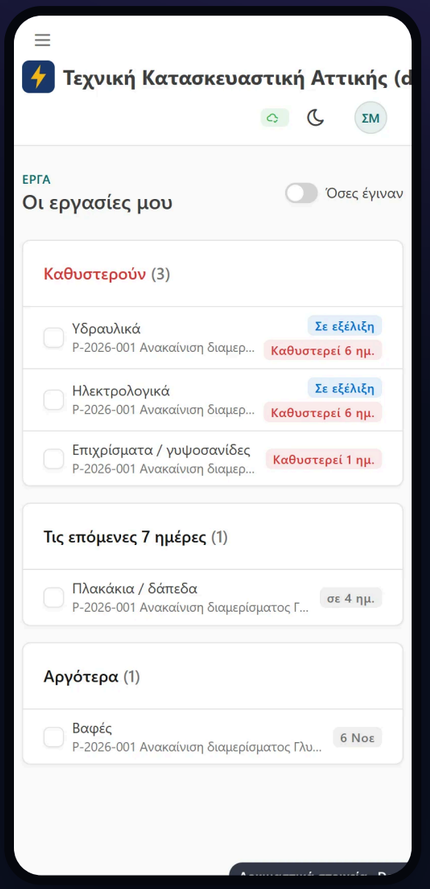

- ✓ Comments with @ that notify a colleague
- ✓ Photos from the phone
- ✓ Repeating tasks (weekly, monthly…)
- ✓ A phone or email notice for a new task

On the team’s phones

Each person sees their own tasks: what is late, what is for today, what is coming. Tick and done.

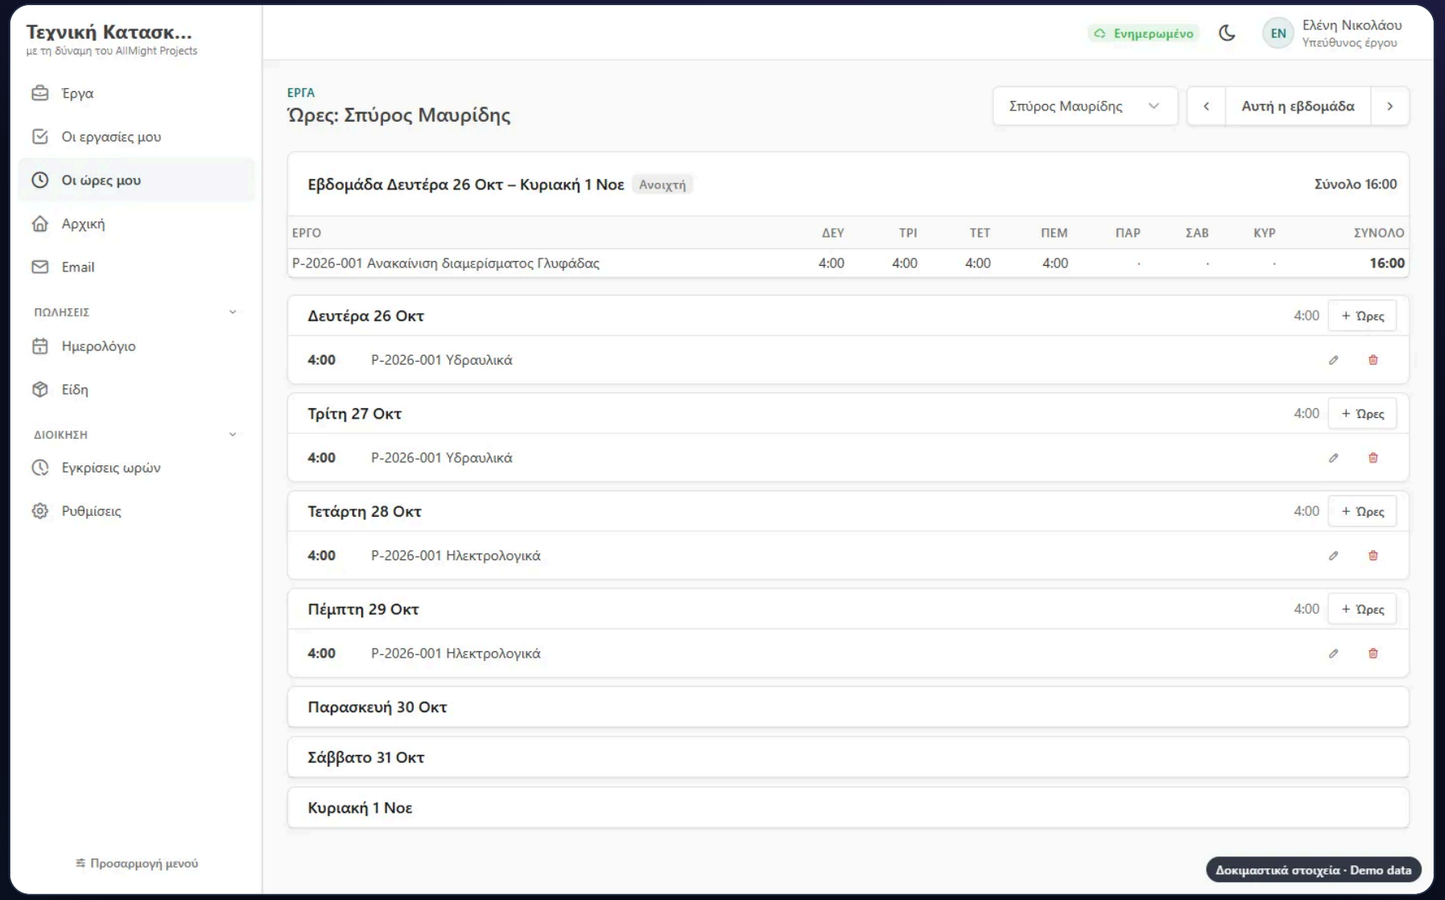

- ✓ «My tasks», also on the home page
- ✓ A morning email with today’s work
- ✓ A timer in the top bar
- ✓ Expenses with a photo of the receipt

Hours and timesheets

A timer or hours by hand, on a project and a task. At the end of the week, sent for approval.

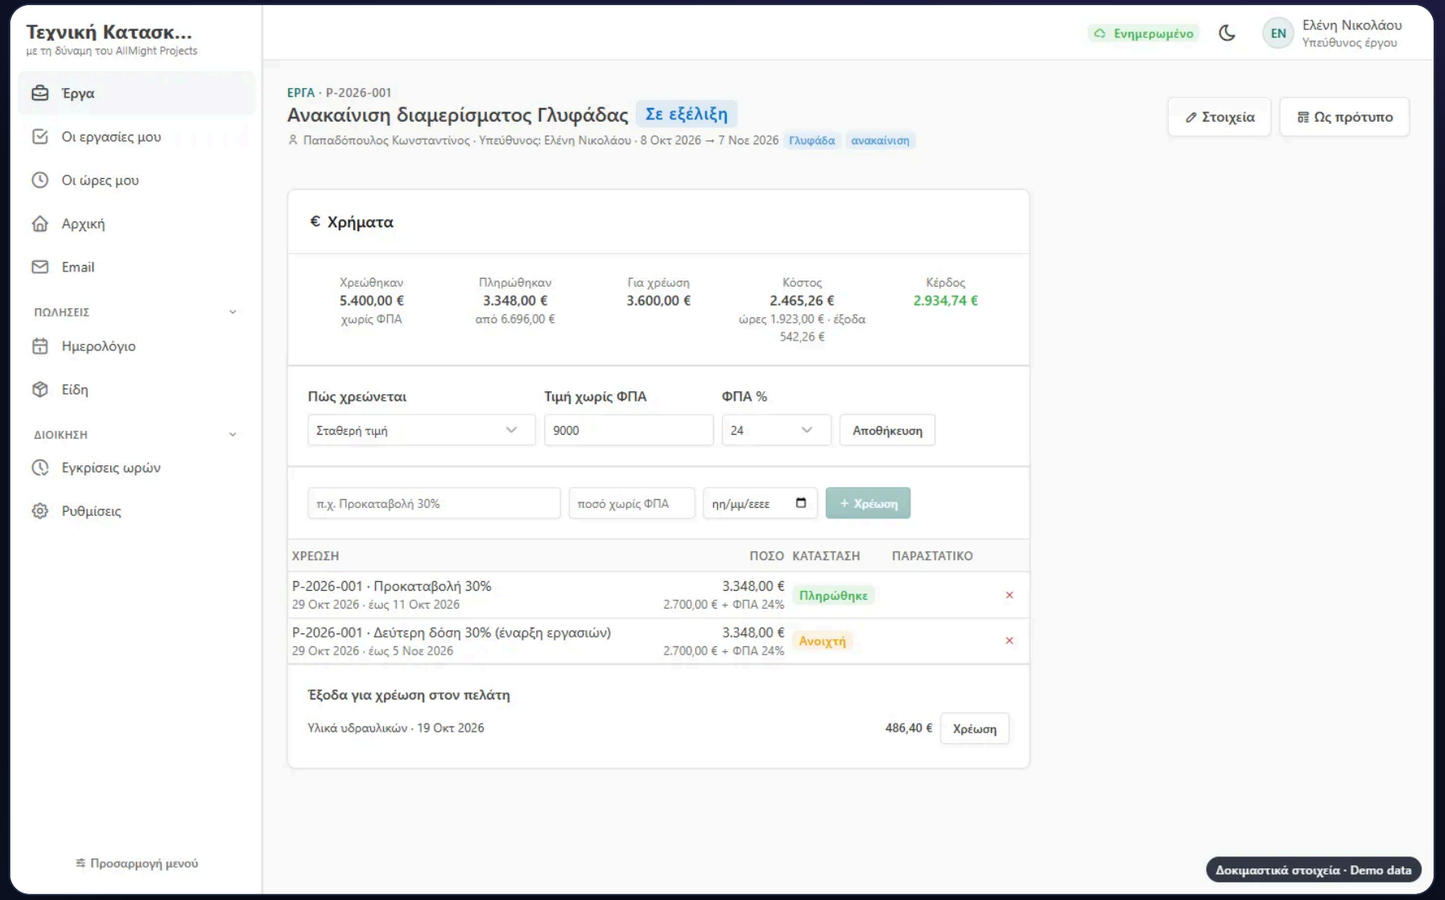

- ✓ Approved, or sent back with a note
- ✓ An approved week is locked
- ✓ Cost and charge per hour for each person
- ✓ Hours against the estimate and the budget

Charges, invoices and profit

A fixed price in instalments, a charge per milestone or by the hour. Charges go to what the client owes and the invoice comes out of AllMight.

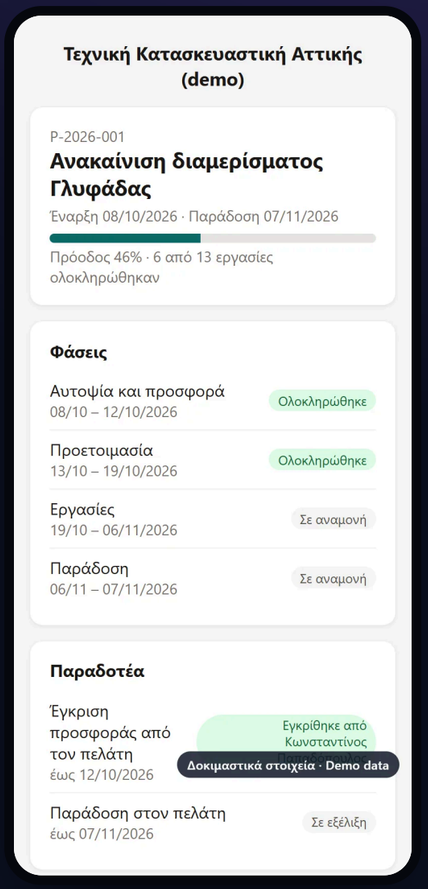

- ✓ Only approved hours are charged
- ✓ Project expenses with the receipt, charged on to the client
- ✓ Profit: charges minus hours and expenses
- ✓ A warning near or over the budget

The client sees the progress

A link for the client, no password: progress, phases, deliverables. They approve with their signature or ask for changes, and send files.

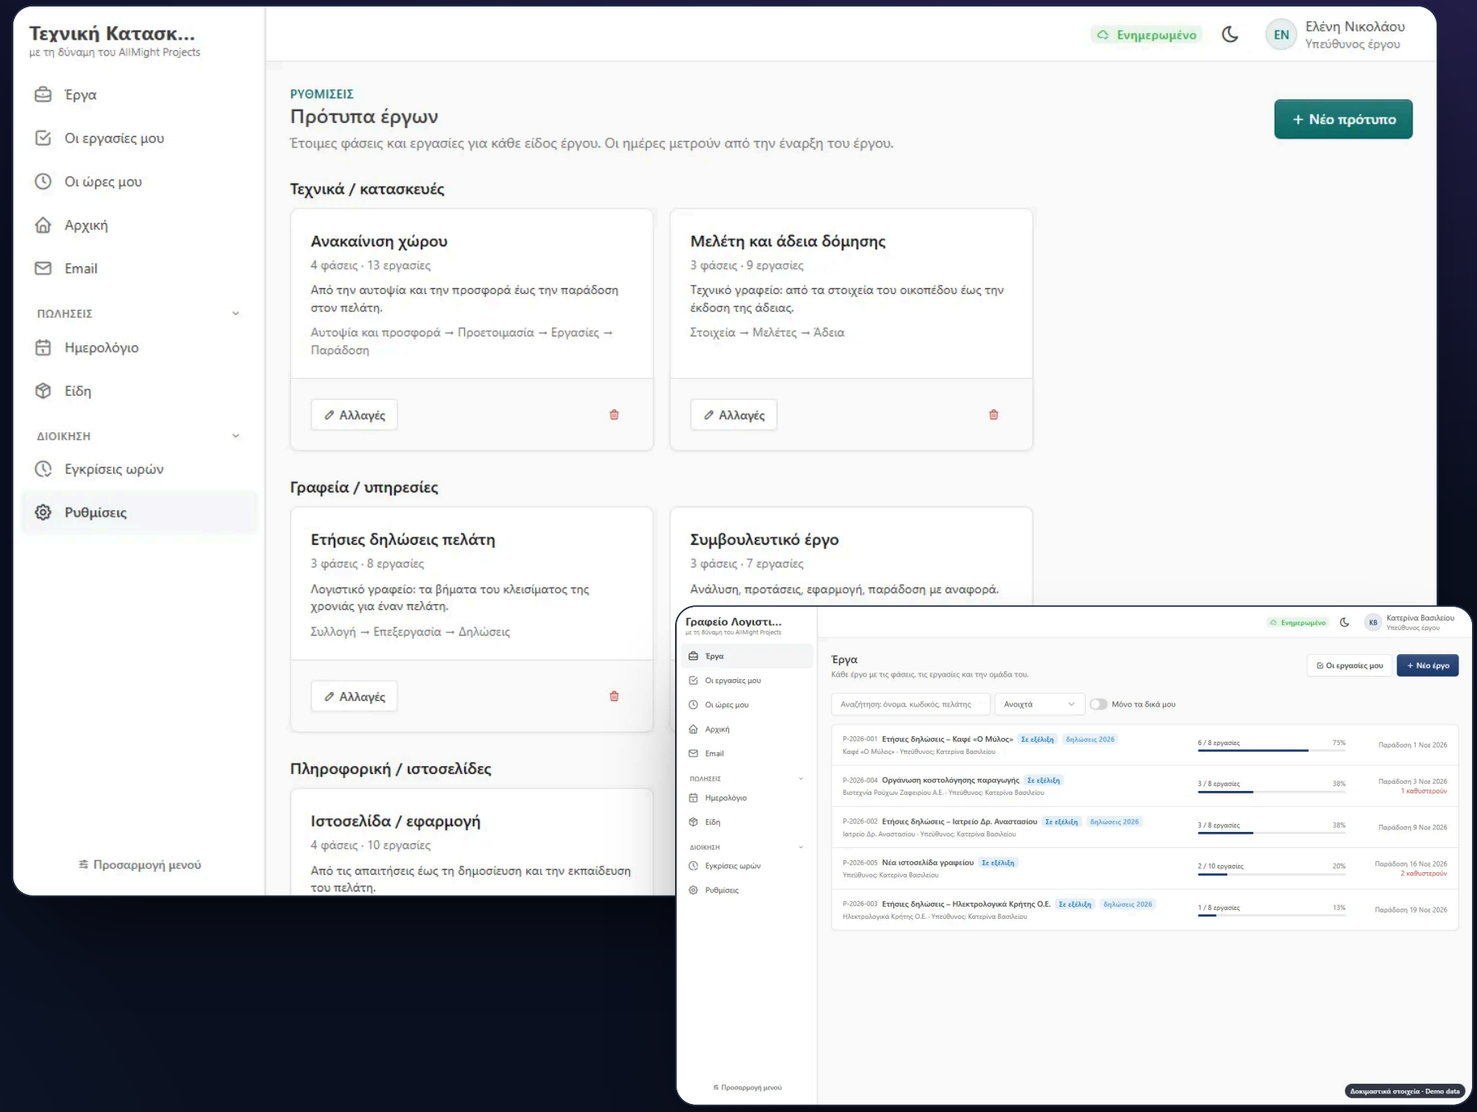

- ✓ The approval is kept with name, signature and time
- ✓ Changes come back to the team as a comment
- ✓ You choose which files they see
- ✓ Closed with one click

Templates for every sector

Ready templates for a renovation, a study and permit, yearly tax returns, a consulting job, a website. A project that went well becomes a template in one click.

- ✓ Phases, tasks, milestones and hours
- ✓ Dates counted from the project's start
- ✓ Change them as you like
- ✓ The same program for technical firms and offices

And also

Calendar

Deadlines and deliveries next to your appointments, on the phone too.

Morning summary

Every morning: what is late, what is for today, which projects go over budget.

Roles

Project manager and team member: each sees what concerns them, amounts only the managers.

With the AllMight suite

Customers, payments owed, e-invoicing and calendar from the shared parts.

Security

The client link is kept only as a fingerprint, expires and closes whenever you want.

Nothing to install

Opens in the browser on desktop, tablet and phone.

Let’s see it with your own projects

A demo with templates of your sector, your projects and clients brought over, a trial period and set-up by us.

- ✓ Monthly subscription
- ✓ Ready templates for your sector
- ✓ Trial period
- ✓ Set-up and training by us
